5. COMMON CLIENT OBJECTIONS AND RESPONSES

Client says	Recommended response
“It is too expensive.”	A site that brings 3–4 new customers a month pays for itself. A ₹9,000 Starter package is also available.
“We get customers from Instagram or Zomato.”	Those channels depend on third-party rules. Your own site appears in Google search and the customer relationship stays with you.
“A relative can build it for free.”	A basic page works. Our packages add Google Business set-up, lead capture, booking and tracking.
“I need time to think.”	Send a sample and quote on WhatsApp, and agree a follow-up date.
“Can you reduce the price?”	Adjust the scope instead: removing a feature lowers the price. Package prices stay fixed.
“What if I get no results?”	No guaranteed rankings or lead numbers are promised. Tracking is set up so results can be measured.

WhatsApp opening message

“Hello [Name], I am [Your name], a web designer in Pune. I noticed [Business] does not yet have a website that appears in Google search. I build simple sites with call, WhatsApp and booking buttons. May I send a sample design and our packages?”

Questions for the team

- Are the prices right for Pune? Starter ₹9,999 or Standard ₹17,999?
- Is a 50% / 40% advance realistic? Care plan with every package?
- US clients: are $300–1,400 right? Payment via PayPal, Wise or Payoneer?
- Build platform: WordPress, Webflow or custom code?

Next steps

- Finalise packages, price sheet and agreement template; build 3 demo sites (cafe, clinic, salon)
- Pitch 10 local businesses daily and log replies and closes; review pricing after 5 sales
